|  |  |   |   |
|--|--|---|---|
| <br>Hampshire Oak | <br>American Mahogany | <br>Vermont Green | <br>Silver Birch |
| <br>Golden Maple  | <br>Country Cedar     | <br>Natural Oak   | <br>Urban Slate  |
| <br>Black Ash    | <br>Cedar Fall       | <br>City Stone   | <br>Boston Teak |

## DECKING STAIN

Decking stains give a richer colour to decking than oil finishes, making them perfect for decks where a more opaque colour is preferred. Stains can be used on new or weathered decks, but for best results clean the wood before treating.

### CUPRINOL ANTI-SLIP DECKING STAIN

- Hard wearing colour

We have produced product colours as accurately as printing will allow. Unfortunately we cannot guarantee an exact colour match, and the colours contained in this guide should not be relied on as such. The appearance of the actual colour can be affected by the substrate and the texture of the surface. Wherever colour testers are available, please use them on the actual surface to which the product is to be applied before undertaking the application. This will give you a stronger indication of the appearance of the actual colour. If a colour tester is not available, then try the product on a small, inconspicuous area of the surface before undertaking the full application.

Special precautions should be taken during surface preparation of pre-1960s paint surfaces over wood and metal as they may contain harmful lead. For further advice contact AkzoNobel.
